

PhD position

The Institute of Geotechnical Engineering and Construction Management is offering a PhD position for 30 months at Hamburg University of Technology, Germany. The research topic is focussed on the numerical modelling of collision between ships and gravity foundations of offshore wind turbines based on Finite Element Method (FEM). The position requires a M.Sc. in civil engineering, if possible with focus on geotechnical engineering. Earnings per month about 1900 € after tax in the first year. Expected project begin: 1.12.2012.

Send application via email including

- application letter
- curriculum vitae
- copy of B.Sc. certificate including grades
- copy of M.Sc. certificate including grades
- copy of Master thesis (or synopsis)
- references by scientific staff, if available
- list of publications, if available
