Vacant Position: Faculty member

Ben-Gurion University of the Negev

Faculty of Engineering
Department of Materials Engineering

Beer-Sheva, Israel

The Department of Materials Engineering seeks an outstanding candidate for a tenure

track position. Applications will be considered in all areas of materials science and

engineering. Priority will be given to the following areas: physical metallurgy,

electronic materials and materials for renewable energy.

The applicant should either have experience in, or show potential for, leading a

research group that involves supervision of students, technicians and research

associates, applying for grants, international collaborations and generating links with

industry.

The applicant is expected to teach undergraduate and postgraduate core courses in

materials science and engineering.

Applicants should submit an application packet containing a cover letter, curriculum

vitae, names and contact details of three referees and a research plan.

All applications should be submitted electronically to Prof. Nachum Frage, e-mail:

nfrage@bgu.ac.il. Please submit PDF files only.

The application deadline is 20 March 2013 and the review begins in early April.
